Summary

Highly driven, motivated professional, willing to learn and adapt to a rapidly changing, highly competitive industry. Possesses refined skills in critical thinking, problem-solving, and strong interpersonal communication skills. Accustomed to delivering results under pressure and within strict deadlines through efficient time management.

Education

Bachelor's Degree of Science in Computer Science 12/2026
Weber State University Ogden, UT

Skills

Languages
- JavaScript, C#, Python, Java, SQL

Frameworks / Technologies
- ASP.Net, Node, Express, React, Django, Bootstrap, MSSQL, MongoDB

DevOps Tools
- Github (Version Control), Zoom, Discord, Kanban Boards, Scrum/Agile Development

Projects

TrackMate - Internal Asset & Training Tracker Software
JavaScript based MERN Application, Used internally by CS administrators in Weber State
- Redesigned the entire backend database for MongoDB to streamline data collection, optimize data storage, and allow for more complex data aggregation across the site.
- Collaborated with team members to clearly define over 20 data models using Mongoose, created 18 RESTful API endpoints in Node.js, and tested API error handling with Postman.
- Developed 13 pages of comprehensive documentation to accelerate training and development, including an ERD (Entity Relation Diagram) to visualize database design, step-by-step instructions to get local site/database setup, detailed breakdowns of current design, known issues, and future improvements.

Cache Collective - Learning Management System
C# based .NET Razor Pages Application , Modeled after LMS apps like Canvas
- Designed dynamic User Dashboard and User Profile Page, tailored to specific user accounts to highlight relevant information at a glance.
- Stepped in to help teammate struggling to integrate Stripe payment processing for tuition payments in order to make the Sprint deliverable deadline.
- Kept project deliverables on track by coordinating group progress updates and paired programming sessions twice per week before Sprint deadlines.

Professional Experience

Sushi Chef   10/2018 – Present
Ohana Sushi   Ogden, UT
- Foster and maintain positive relationships with food vendors and regular customers through strong communication, customer service, social skills, and a good memory for small details.
- Effective communication and coordination between wait staff, head chef, and back-of-house staff to deliver products to customers in a high-stress, fast-paced work environment without compromising on quality.
